

## Artist / Pascal Brateau

**vanité**, sculpture, 2012,  
photographed at ENSANancy (Fr)

**Pascal Brateau** studied architecture in Nancy (Fr) and Porto (Pt). In 1994, he created the art fanzine "pierre inerte" with Jean Decap in Toulouse. In 1995, he founded a design and interior architecture studio in the Azores Islands. French "d.p.l.g." architect since 2000, he is one of the founders of the studio dbdarchitects and shares his time now between Nancy (Fr) and Berlin (De).

Artist/architect who is convinced that today art must occupy space, investing the slightest hidden corner of questioning and affecting all social classes, his pieces call out directly to the viewers, questioning them directly by disturbing their reality. The work takes place in a landscape, whatever it is : rural, urban, public or private, interior or even virtual.
